

**QUESTIONS AND ANSWERS
WAR MEMORIAL CONSERVATION
RFP#15-06-07**

1. Is the project subject to any wage scale/prevailing wage requirements?

A. No.

2. Is there power, potable water, and restroom facilities at the site? If yes, will they be made available to the Offeror at no cost?

A. Public restrooms are available in the municipal building, located across the street from the War Memorial site. The Offeror may elect to use its own recirculating water system and/or coordinate access to public water by contacting the Western Virginia Water Authority at (540) 853-5700 and selecting the customer service option. The Offeror has available access through a temporary tap/hydrant and/or a 1 ½ inch water service near the project site. There will be costs associated with access to public water, which are determined by the Western Virginia Water Authority. As stated in RFP#15-06-07, the City requires 100% control and containment of all wash/wastewater and lawful disposal via sanitary sewer. In its plan, the Offer shall provide specific details as to how they will meet those requirements. Offeror are encouraged to use drawings, product references and other "tools" to help articulate its plan for disposal.

3. Are there any images of the memorial shortly after installation that could be made available to bidders?

A. No.

4. Do you have any further photographs or other details showing the conditions cited in the report?

A. Please see attached.

5. Are there other plaques as well? Also, please clarify that the scope includes a plinth and plaques but the illustration is solely the 3 marble slabs. I am assuming that other items at the site, pavers, flagpoles, lights, are not included.

A. The Scope of work includes a plinth and plaques, in addition to the columns. Pavers, flagpoles, and lights are not included.

6. What departments should be contacted for wash/wastewater disposal questions?

A. Please contact the City of Roanoke Office of Environmental Management at (540) 853-2425.
